## Objective

---

Aspiring Software Developer with foundational knowledge of Java, SQL, HTML, CSS, JavaScript, and the React framework. Eager to apply technical skills in a practical setting, contribute to meaningful projects, enhance knowledge, and collaborate with a talented team.

## Education

---

**Syed Ammal Engineering College**, BE in Computer Science

2022 - 2026

- CGPA: 8.40

**National Academy matriculation school**, Higher Secondary

2021 - 2022

- Percentage - 89

## Experience

---

**React Intern**, MarqWon Dynamics Pvt Ltd

August 2025 - present

- Developed a Supply Chain Management web application using React.js, Node.js (Express), and MySQL.
- Designed and implemented a purchase module that enables users to buy products, manage delivery addresses, process payments, and display order summaries.
- Built RESTful APIs for seamless data flow between manufacturers, wholesalers, distributors, and retailers, ensuring efficient order tracking across the supply chain.
- Integrated database models to store and retrieve order, payment, and delivery details securely.
- Collaborated with the backend and frontend teams to enhance system performance and maintain consistent UI/UX.

**Java Full Stack Development Intern**, MarqWon Dynamics Pvt Ltd

July 2025 - August 2025

- Designed and developed Jewel Vault, a web application for gold savings and online jewelry shopping.
- Implemented smart saving plans allowing users to save money online and redeem it as gold.
- Enabled users to browse jewelry designs (bangles, necklaces, rings) and add items to a wishlist.
- Built using Java Servlets, JDBC, and JSP for backend processing, database connectivity, and dynamic UI rendering.

## Skills

---

### Hard Skills

**Programming:** Java, SQL, HTML, CSS, JavaScript

**Frameworks :** React.js , Express.js

**Databases:** MySQL

**Backend Technologies:** JDBC, Servlets, Jsp , Node.js

**Tools:** Eclipse, MySQL Workbench, VS Code, Git, GitHub, Netlify

### Soft Skills

Communication, Teamwork, Problem Solving, Time Management, Adaptability

## Projects

---

**Library Management System**

Project Link

- Developed a Library Management System to track and manage book inventories, enabling users to view, borrow, and return books with ease.

- Improved efficiency by automating inventory updates and reducing manual tracking errors.
- Tools Used: Java,MySQL

### Gamehub

[Project Link](#)

- Developed Gamehub with a main menu and game interfaces for Tic-Tac-Toe and Snake.
- Enhanced user experience with responsive layouts and interactive buttons for smooth navigation between games.
- Tools Used: Java Swing

### Weather Forecasting Website

[Live Demo](#) [Project Link](#)

- Developed a weather forecasting website where users can search for a city to view current weather data, including temperature, humidity, and wind speed.
- Integrated the OpenWeather API for live updates and built an interactive, responsive interface using React.
- Tools Used: React, OpenWeather API

## Certifications

---

Core Java Certifications @SRM Infotech	2024
Html,Css,Javascript in cousera	2025
React in cousera	2025

## Additional Information

---

### Certification Achievement

Participated in Rally 2k24

participated in ISTE project

**Languages** – English, Tamil
